Who Would Pay This \$2,000,000 Loss In Alabama Tax Revenues?

J. W. BROCK,

OULD Alabama, its counties and municipalities and estitutions afford to lose the sorely needed sum of \$2,000,000 annually in tax revenue? What new taxes would be levied to make up this

These are not mere idle questions. They are vital questions, which may soon call for answers from the taxpayers and citizens of this State. If the Tennessee Valley Authority should extend its operations throughout Alabama and pay taxes only on the basis agreed upon, Alabama, its counties and cities, would lose tax revenues amounting yearly to approximately TWO MILLIONS. This grim prospect, whose grave significance is as yet only faintly realized, is this:

The Tennessee Valley Authority has agreed to pay as its total taxes in the State of Alabama, only 5 per cent upon its proceeds from the sale of power at wholesale rates.

On this same basis, private power companies in Alabama would have paid in taxes in this State during 1934, less than \$400,000 instead of approximately \$2,400,000 which they actually did pay. In brief, the State, its institutions, its counties and municipalities would lose the difference in \$2,400,000 and \$400,000 which is \$2,000,000. What State funds, what State institutions, what Counties would lose this \$2,000,000?
